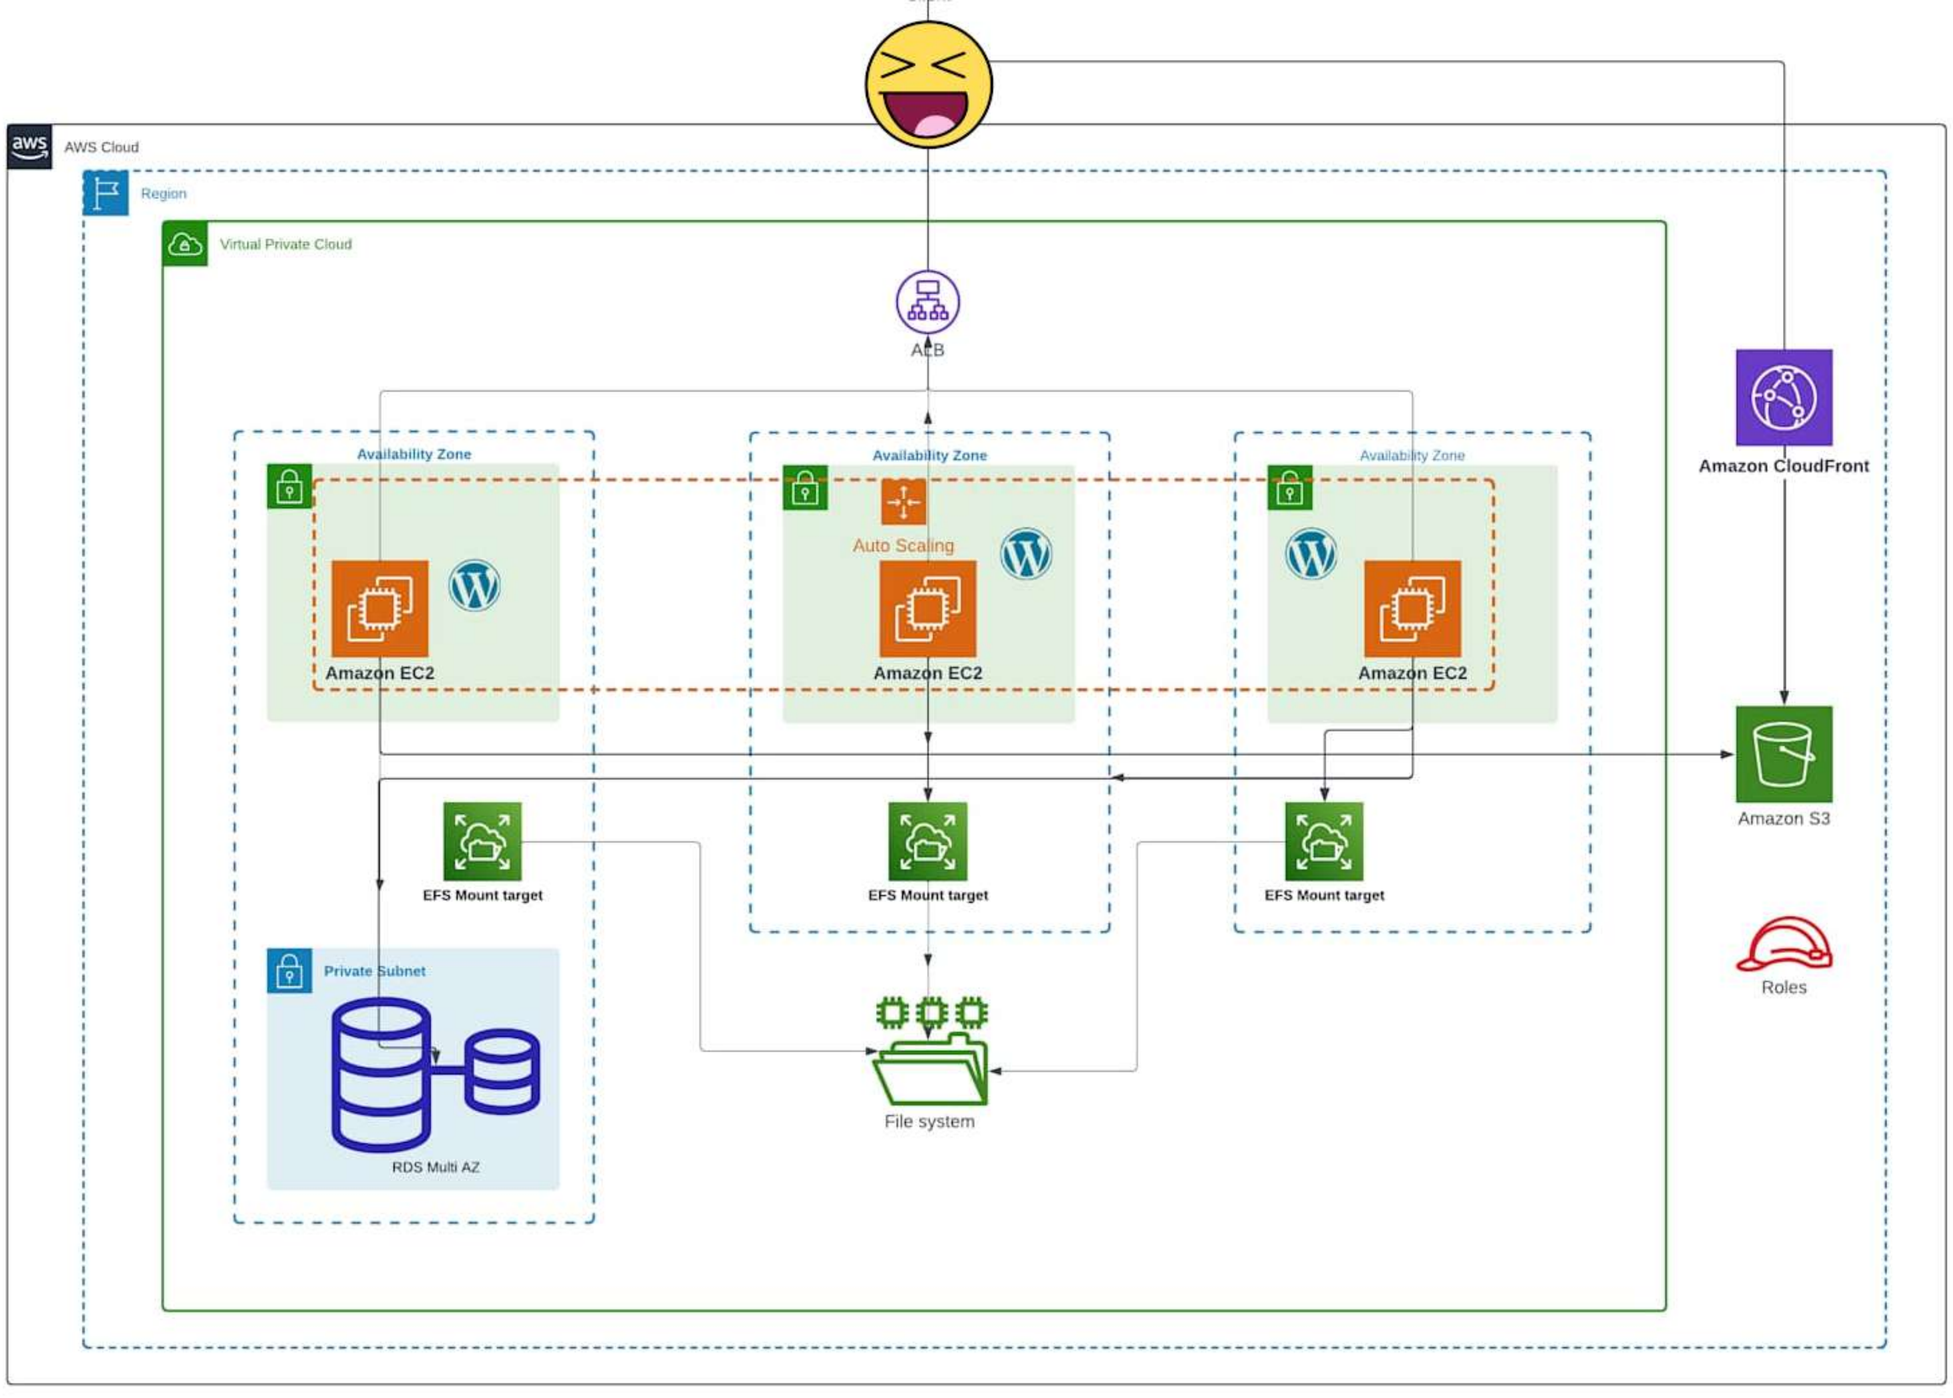
The good things



Storage

Superb Storage Service (S3)

🪦 Requiem for Select 🪦

⚡ Faster ⚡

⛰️ Higher ⛰️

💪 Stronger 💪

🤝 Together 🤝

DynamoDB + SQL

PartiQL is a SQL-compatible query language for querying and analyzing semi-structured data across AWS services like DynamoDB, S3, and Redshift.

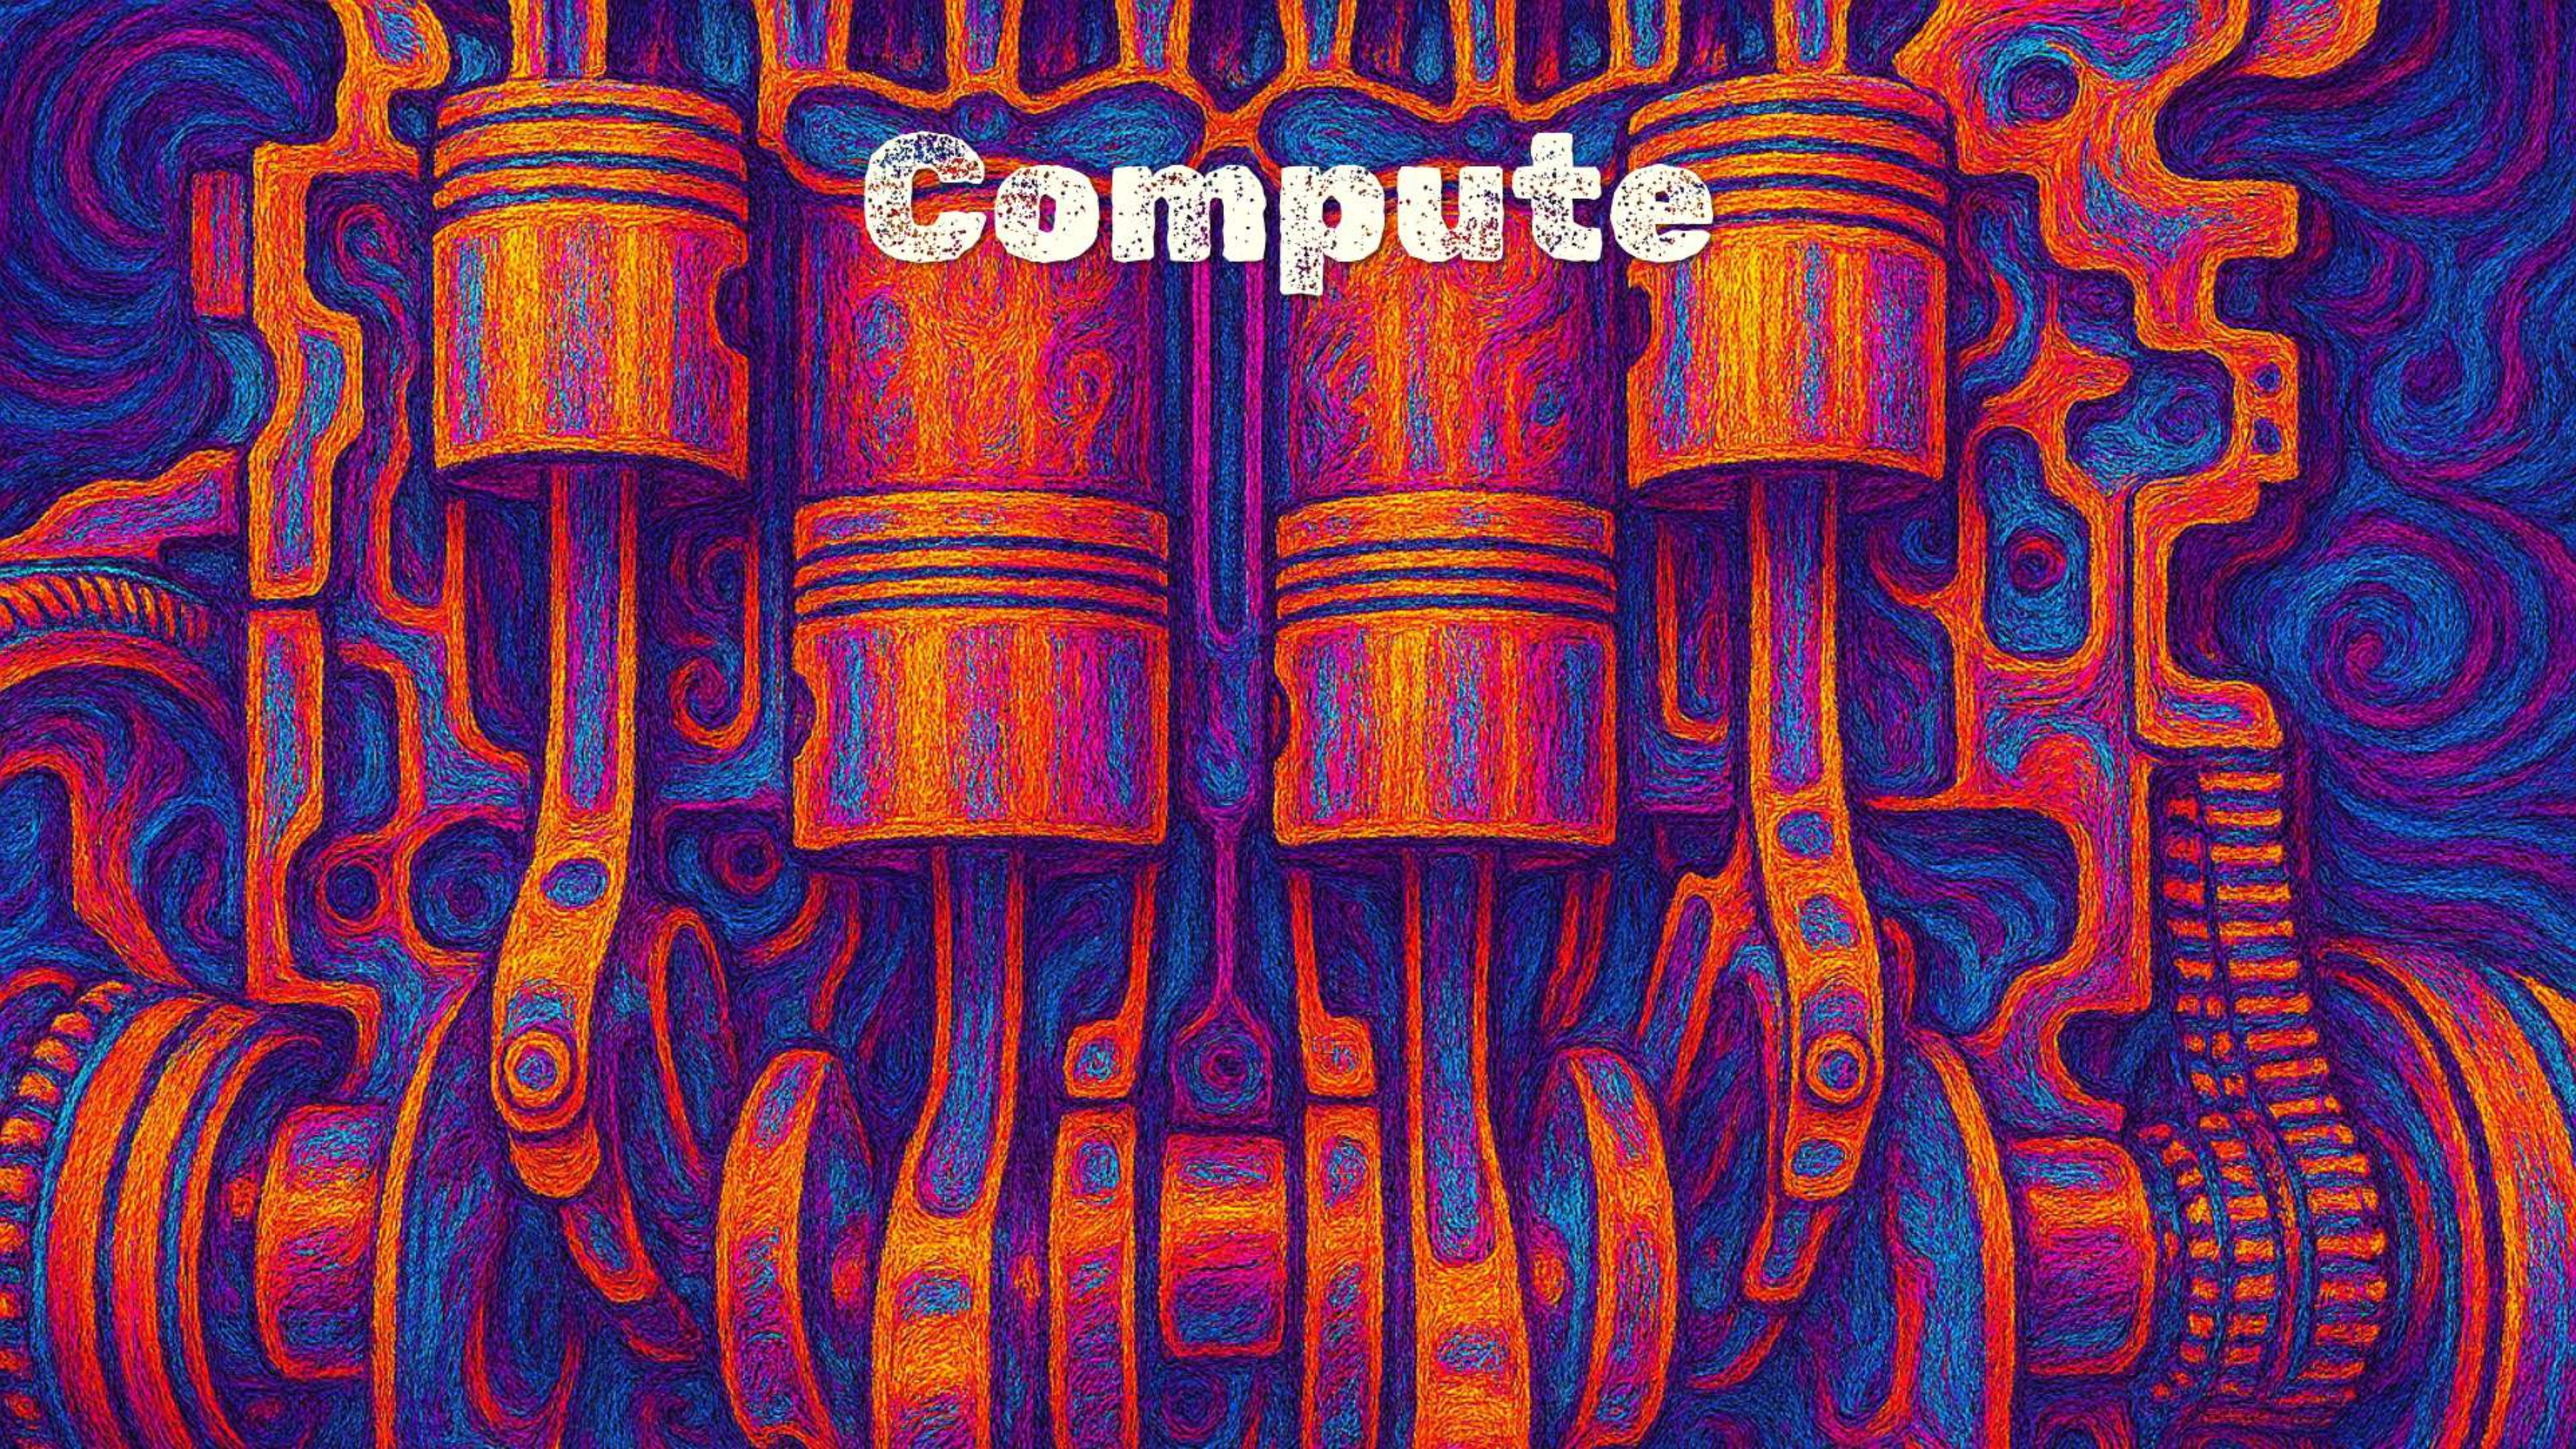
There will be dragons 🐉

RDS (Aurora)

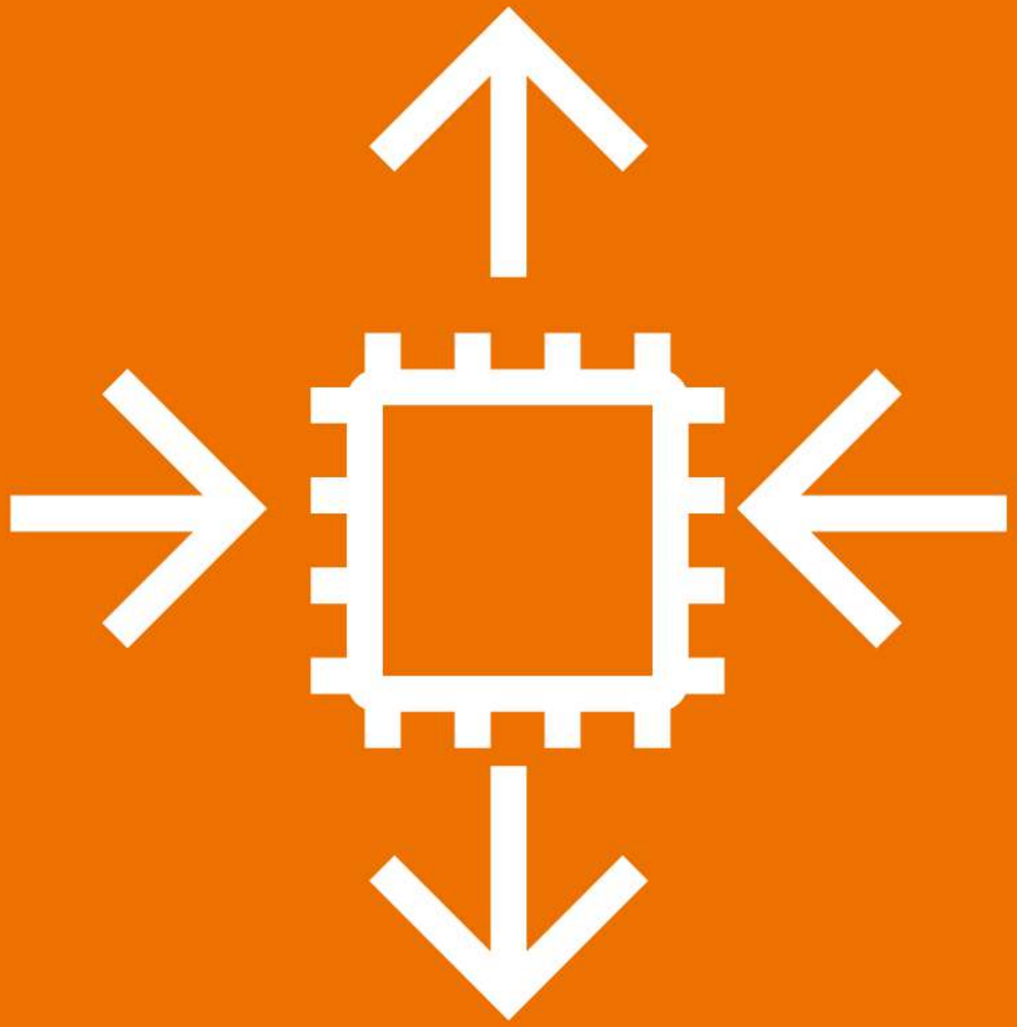
🧬🧬 **Fast cloning** with copy-on-write snapshots for dev and reporting

🪧 **Local write forwarding** on replicas eliminates dual endpoints with 20ms latency

💸💱 **Aurora I/O-Optimized** for stop worrying about IOPS



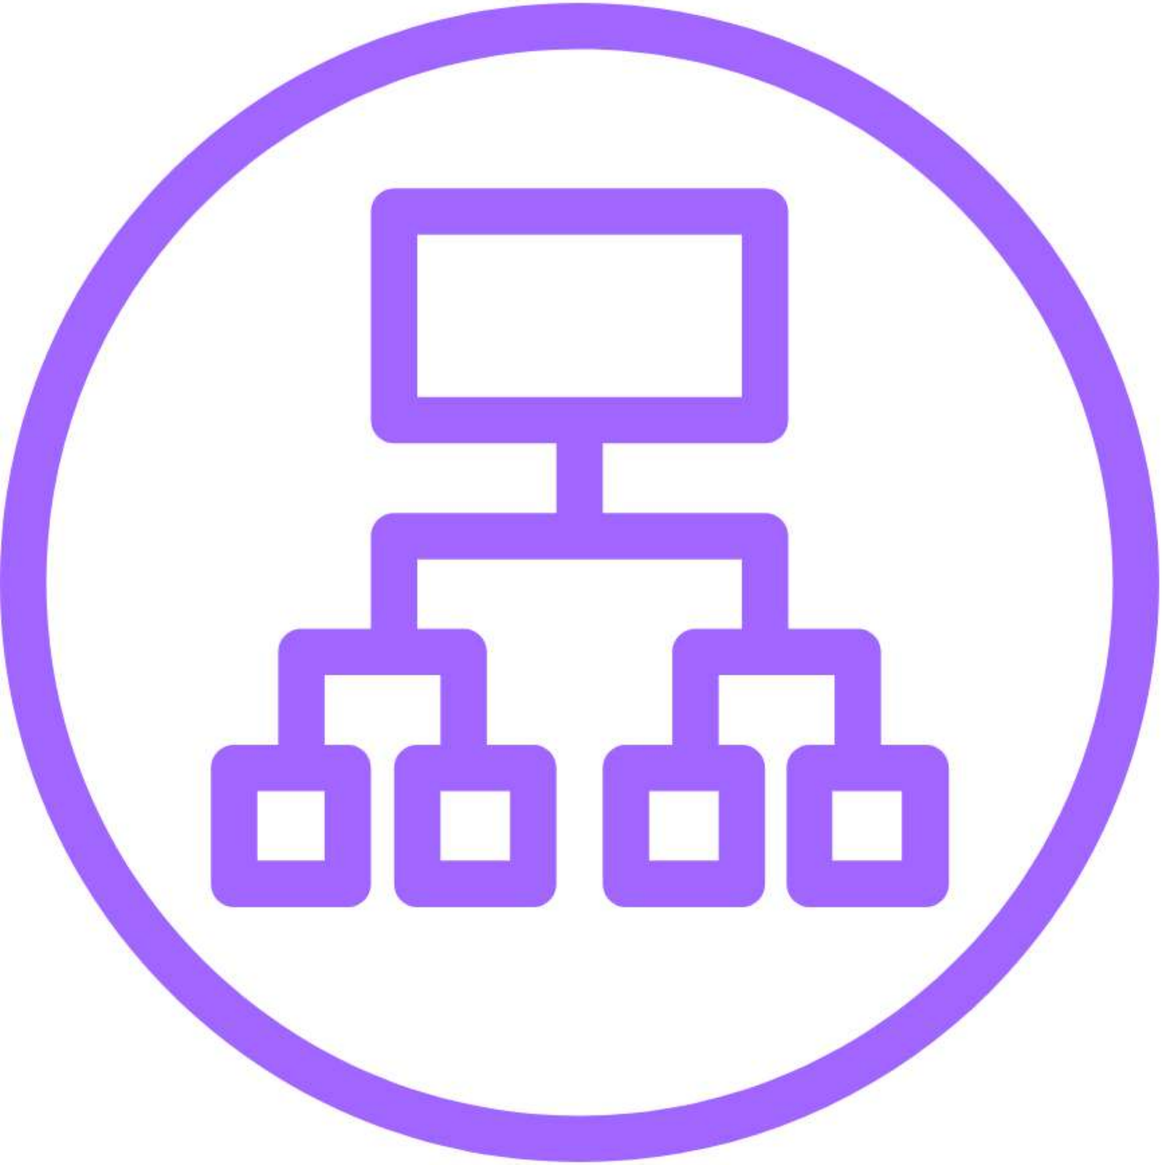
Compute



Autoscaling Groups

- 💤 License management
- 🔥 Maximum Instance Lifetime
- ✨ Capacity rebalancing
- 🌡️ Warm Pool
- ♻️ EC2 Instance Refresh

Traffic

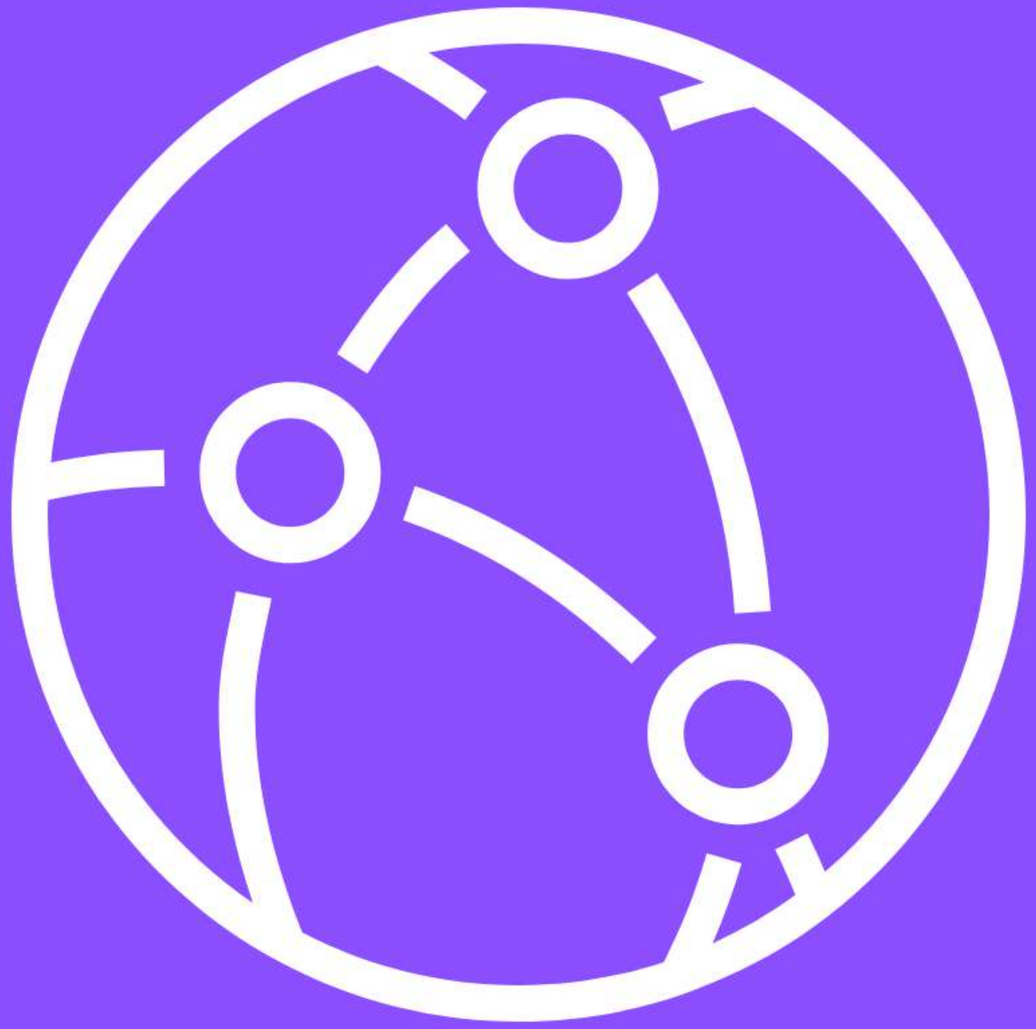


App Load Balancer

🔐 OIDC-compliant authentication

🔢 Least_outstanding_requests connections

🩺 Health thresholds



CloudFront

💲 Fixed price plans

🔵🟢Staging distributions

🏗️ Continous deployment
